

Processing SQL Statements

Soumis par OCA

19-03-2008

Dernière mise à jour : 15-04-2008

-
Processing a DQL query (SELECT) : parse/bind/execute/fetch --> returns rows

-
Processing a DML statement (INSERT,UPDATE,DELETE) : parse/bind/execute --> logs changes and allows rollback

-
Processing DDL (CREATE,ALTER,DROP/TRUNCATE,RENAME) and TCL (COMMIT,ROLLBACK,SAVEPOINT) statements : parse/execute --> no rollbacks allowed
